

Evaluation Board for the AD5310R 10-Bit, Single-Channel, Voltage Output DAC

FEATURES

Full featured evaluation board in conjunction with
nanoDAC® motherboard ([EVAL-MBnanoDAC-SDZ](#),
included in evaluation board package)

On-board references

Various link options

PC control in conjunction with Analog Devices, Inc., system
demonstration platform (SDP)

PACKAGE CONTENTS

EVAL-AD5310RDBZ board

EVAL-MBnanoDAC-SDZ motherboard

SOFTWARE REQUIRED

[EVAL-AD5310RDBZ](#) evaluation software

HARDWARE REQUIRED

EVAL-SDP-CB1Z (SDP-B) board or [EVAL-SDP-CS1Z \(SDP-S\)](#)
board, must be purchased separately

DOCUMENTS REQUIRED

Electronic version of the [EVAL-AD5310RDBZ](#) user guide

Electronic version of the [AD5310RDBZ](#) data sheet

EVALUATION BOARD HARDWARE

MOTHERBOARD POWER SUPPLIES

The [EVAL-MBnanoDAC-SDZ](#) motherboard supports single and dual power supplies.

The [EVAL-AD5310RDBZ](#) evaluation board can be powered from the SDP port or externally by the J5 and J6 connectors, as described in Table 1.

Both AGND and DGND inputs are provided on the board. The AGND and DGND planes connect at one location on the [EVAL-MBnanoDAC-SDZ](#). The AGND and DGND inputs must not be connected elsewhere in the system, because this causes ground loop problems.

All supplies are decoupled to ground with 10 μ F tantalum and 0.1 μ F ceramic capacitors.

Table 1. Power Supply Connectors

Connector No.	Label	Voltage
J5, Pin 1 (J5-1)	VDD	Analog positive power supply, V_{DD} single and dual supply, 5.5 V.
J5, Pin 2 (J5-2)	AGND	Analog ground.
J5, Pin 3 (J5-3)	VSS	Analog negative power supply, V_{SS} dual supply, -5.5 V.
J6, Pin 1 (J6-1)	VLOGIC	Digital supply from 1.8 V to V_{DD} of the daughter board DAC.
J6, Pin 2 (J6-2)	DGND	Digital ground.

MOTHERBOARD LINK OPTIONS

A number of link options are incorporated in the [EVAL-MBnanoDAC-SDZ](#) and must be set to the required operating

Table 3. Motherboard Link Functions

Link No.	Function
REF1 to REF4	These links select the reference source. Position EXT selects an off-board voltage reference via the appropriate EXT_REF_x connector. Position VDD selects V_{DD} as the reference source. Position 4.096V selects the on-board 4.096 V reference as the reference source. Position 2.5V selects the on-board 2.5 V reference as the reference source. Position 5V selects the on-board 5 V reference as the reference source.
LK5	This link selects the positive DAC analog voltage source. Position A selects the internal voltage source from the SDP-B or SDP-S board. Position B selects the internal voltage source 3.3 V from the ADP121 on the motherboard. Position C selects an external supply voltage, V_{DD} .
LK6	This link selects the VLOGIC voltage source. Position 3.3V selects the digital voltage source from the SDP-B or SDP-S board, 3.3 V. Position VLOGIC selects an external digital supply voltage, V_{LOGIC} .
LK7	This link selects the negative DAC analog voltage source. Position A selects V_{SS} . Position B selects AGND.

conditions before using the board. Table 2 describes the positions of the links to control the evaluation board via the [SDP-B](#) board using a PC and external power supplies. The functions of these link options are described in detail in Table 3. The positions listed in Table 2 and Table 3 match the evaluation board imprints (see Figure 11).

Table 2. Default Link Options Setup for SDP-B Control

Link No.	Position
REF1	2.5V
REF2	EXT
REF3	EXT
REF4	EXT
LK5	C
LK6	3.3V
LK7	B

EVAL-AD5310RDBZ DAUGHTER BOARD LINK OPTIONS

The [EVAL-AD5310RDBZ](#) daughter board shares the same printed circuit board (PCB) layout with the [EVAL-AD5311RDBZ](#). To configure the board for AD5310R evaluation, LK1 must be removed to ensure that the SCLK pin is not directly connected to V_{DD} .

EVALUATION BOARD SOFTWARE

SOFTWARE INSTALLATION

The EVAL-AD5310RDBZ evaluation software is compatible with Windows® Vista (64-bit/32-bit), and Windows 7 (64-bit/32-bit).

The software must be installed before connecting the SDP-B or SDP-S board to the USB port of the PC to ensure that the SDP-B or SDP-S board is recognized when it connects to the PC.

To install the software, take the following steps:

1. Start the Windows operating system. Download the installation software from the [EVAL-AD5310RDBZ](#) evaluation board page.
2. Run the setup.exe file from the installer folder if it does not open automatically.
3. After installation is completed, power up the evaluation board as described in the Motherboard Power Supplies section.
4. Connect the evaluation board to the SDP-B or SDP-S board and plug the SDP-B or SDP-S board into the PC using the USB cable included in the evaluation kit.
5. When the software detects the evaluation board, proceed through any dialog boxes that appear to finalize the installation.

LAUNCHING THE SOFTWARE

To launch the software, take the following steps:

1. Connect the evaluation board to the SDP-B or SDP-S board and connect the USB cable between the SDP-B or SDP-S board and the PC.
2. Power up the evaluation board as described in the Motherboard Power Supplies section.
3. From the Start menu, click All Programs, Analog Devices, AD5310R Evaluation Software.
4. If the SDP-B or SDP-S board is not connected to the USB port when the software is launched, a connectivity error displays (see Figure 2). Connect the evaluation board to the USB port of the PC and wait a few seconds. When the SDP-B or SDP-S board is detected, the display is updated (see Figure 3).

Alternatively, the software can be used without an evaluation board. The software runs in simulation mode displaying expected outputs based on the input data. The main window of the [AD5310R](#) evaluation software then opens, as shown in Figure 4.

SOFTWARE OPERATION

The software for the AD5310R allows the user to program values to the input and DAC registers of each DAC individually or collectively.

Write to Input Register

Click **Write to Input Register** to load the code of the input data control to the input register of the DAC.

Update DAC Register from Input Register

Click **Update DAC Register from Input Register** to copy the value in the input register to the DAC register. The DAC output automatically updates with the appropriate voltage.

Write to Input and DAC Registers

Click **Write to Input and DAC Registers** to load the code of the input data control to the input register and DAC register of the DAC. The DAC output automatically updates with the appropriate voltage.

LDAC Control

Click **Pulse LDAC** to bring the LDAC pin low and then back high. Doing this copies the data from the input register to the DAC register, and the output updates accordingly.

The LDAC pin can also be set high or low by clicking **LDAC HIGH** or **LDAC LOW**.

Power-Down Control

The DAC has a selection box allowing the device to operate in normal mode or three different power-down modes, as shown in Figure 5. Click the blue expand button on the **POWER-DOWN CONTROL LOGIC** block to access the selection box (see Figure 4). When the power-down setting for the DAC is selected, click **OK** to write the appropriate values to the AD5310R.

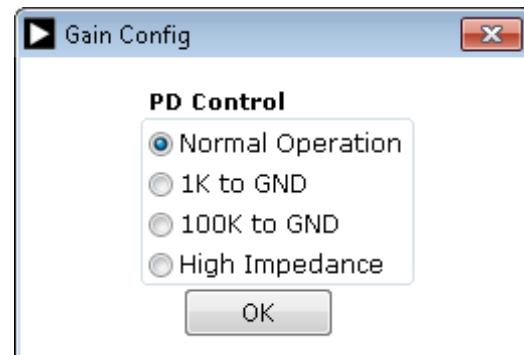

Figure 5. PD Control Selection Box in the Gain Config Window

GAIN Control

The GAIN pin can also be set high or low by clicking the blue expand button on the SPI block (see Figure 4). In the **GAIN** selection box of the **Gain Config** window, select **X1** for a full-scale output of 2.5 V or select **X2** for a full-scale output of 5 V, as shown in Figure 6.

NOTES

I²C refers to a communications protocol originally developed by Philips Semiconductors (now NXP Semiconductors).

ESD Caution

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
